

Manual, Test Sample Clicker Press

www.WorldofTest.com

Press Specifications:

Cutting Pressure: Up to 5 Tons

Swing Rotation: 360degrees

Max. cutting thickness: 10mm

Cutting board: Poly Propylene

Cutting board size: 12" x 9"

Press Width: 12"

Press Depth: 14"

Press Height: 14"

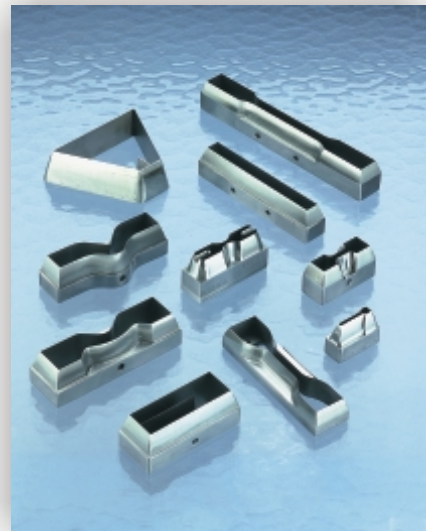

Handle Height: 32"

Press Weight: 100lbs.

Height Adjustment: Knob on top of post = Infinite Adjustment to height within its range.

These machines operate well in stand-alone cutting situations, and also compliment a Hydraulic press for smaller operations.

With the single lever rotation and compressing action, it's speed of operation is quite surprising and you can be up and cutting for a fraction of the cost of a hydraulic press.
