STANDARDS

ASTM E 10

ISO 17025

Introducing "King Brinell Test Blocks" – precision-engineered metal hardness test blocks designed by KING Tester. These blocks, meeting or surpassing ASTM E-10 standards, feature patented designs for enhanced accuracy. Available in 4"x 4" and 2"x 6" sizes, they offer exceptional value with savings of over \$1.00 per test.

The KING precision grid ensures accuracy, visibility, and ease of reporting. Laser-etched markings, compliance with ASTM standards, and individual serialization with traceability make these blocks reliable for daily verification. ISO-17025 certified, they cater to HB 30, HB 15, HB 10, and HB 5 hardness testing requirements.

APPLICATIONS

King Brinell Test Blocks

KING Tester offers an extensive range of Brinell metal hardness test blocks that meet or surpass ASTM E-10 standards. The patented design of KING Tester enhances test accuracy, providing the most cost-effective and reliable daily verification for Brinell testers. Two available sizes for test blocks are 4"x 4" and 2"x 6". Our large block size offers exceptional value, yielding a comparable savings of over \$1.00 per test.

4 X 4

2 X 6

The KING precision grid design enhances test accuracy, visibility, and reporting. Laser-etched markings cover the entire grid with spacing compliant with ASTM E-10, 7.7: Indentation Spacing standard. The patented, etched alphanumeric grid on the 4" x 4" block simplifies daily verification recording exceptionally. Each block is individually serialized and traceable, with ISO-17025 certification. The product meets ASTM E-10 standards and is available for HB 30, HB 15, HB 10, and HB 5.
