Life Science Equipments

Life Science instruments help your lab run faster workflows for gene delivery, growth kinetics, nucleic acid purification, and lab-scale drying. This portfolio covers biolistic and electroporation-based transfer, automated Microbial Growth Curve Analyzer platforms for aerobic and anaerobic cultures, magnetic-bead purification systems, and a compact spray dryer for rapid powder generation.

Product Lineup

Product family	Models	Best fit for labs that need
Gene delivery (biolistic)	QualiGG™ Basic, QualiGG™ Port	Direct delivery into tissues/cells when transfection is inconsistent or time-sensitive.
Electroporation	QualiEP™ Basic, QualiEP™ Adv	Controlled pulse transfer with adjustable parameters for bacteria, yeast, mammalian, and plant work.
Microbial growth kinetics	QualiMGCA™ Basic 100, QualiMGCA™ Pro 200, QualiMGCA™ Anaerobic	Parallel microplate growth curves with controlled incubation, shaking, and absorbance detection.
Nucleic acid purification	QualiNAP™ 32, QualiNAP™ 96	Magnetic-bead purification with 1-32 throughput and flexible mixing/temperature control.
Spray drying	QualiSD™ Mini	Fast conversion of liquids to free-flowing powders for formulation and materials R&D.

Why Choose Qualitest for Your Life Science Equipment?

- Faster comparisons across conditions: Microplate growth monitoring supports parallel screening with up to 192 channels.
- Less handling, lower contamination risk: Growth curve workflows keep cultures in the plate during the run.

- Flexible gene delivery options: Choose biolistic delivery for direct tissue targets or electroporation for parameter-controlled transfer.
- Repeatable purification protocols: Magnetic-bead purification with programmable methods and controlled temperatures improves consistency.
