APPLICATIONS

The Thickness Tester - CX-1000 combines our patented capacitance sensor with industry-leading software to give you plastic film thickness profiling resolution to one micron. This gauge can be run as a stand-alone bench unit, or can be connected to a computer for RS-232 operation by our Thickness Tester - CX-1100 Quality Control Software. Capacitance measurement is industry-recognized as the best choice for off-line, high resolution, continuous gauge profiling for plastic films.

The Thickness Tester - CX-1020 revolutionized capacitance film thickness gauging with the introduction of our patented AutoCal™ concept - by adding an absolute (contact) measurement probe with the capacitance sensor, the Thickness Tester - CX-1020 is self-calibrating. No more need to create detailed recipes to recall calibration information. Accidental operator errors are reduced, accuracy is increased, because different polymers and blends require different calibration values.
